OVERVIEW

A Behavioral Health Group with multiple locations and a combination of in and out-of-network claims, has a billing company to assist with claims management. Being out-of-network, the facility receives a large amount of upfront negotiation requests that fall outside the billing company's standard process. Working alongside the billing company, Collect Rx was able to negotiate these requests, and helped generate over \$3.9M in collections.

HOW WE HELPED

Revenue cycle teams are setup to code, bill, and collect payments from the insurance company. Upfront negotiations fall out of the standard AR management process. Additionally, billing systems and RCM tools are not setup to track the process, results and comps to use for future cases.

Collect Rx can step in to take on this process with very little effort from the provider. Collect Rx acts as the point of contact on these cases, and with minimal access, becomes self-sufficient in the process. Our proprietary CRXIS business intelligence engine intakes the cases bumps them up against comps from our more than 4,000 clients, and generates results. After claims are negotiated CRx even follows up to ensure claims are processed before the settlement amounts.

- Upfront Recovery "Negotiation" Service includes:
 - The intake and processing of all upfront settlement requests received directly from 3rd party vendors or You the client.
 - Maximizing negotiations and recovery of these claims.
 - Follow up and payment verification of negotiated claims.
 - Portal access for providers
